

# **TMR2307**

3 axis TMR linear sensor

# **General Description**

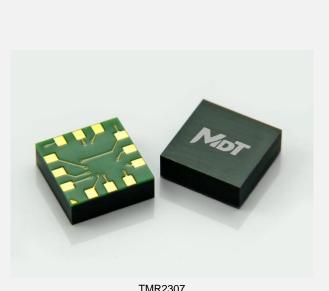

The 3-Axis TMR2307 linear sensor utilizes three unique push-pull Wheatstone bridges. The 3-Axis TMR2307 is available in a 7 mm X 7mm X 2.5 mm LGA package.

#### **Features and Benefits**

- Tunneling Magneto resistance (TMR) Technology
- **Triple-axis Linear Detection**
- High Sensitivity (8 mV/V/Oe)
- Low Power Consumption
- **Excellent Thermal Stability**
- Compatible with wide Range of Supply Voltages
- No need for set/reset calibration
- Very Low Self-Noise (1nT/rtHz@1Hz)

## Applications

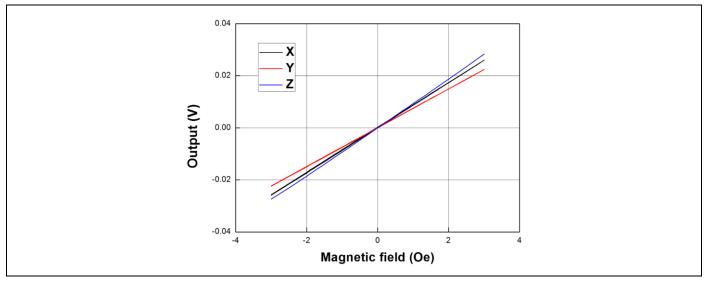

- Three Orthogonal Direction Sensing
- Weak Magnetic Field Sensing
- **Current Sensors**
- Position and Displancement Sensing

TMR2307

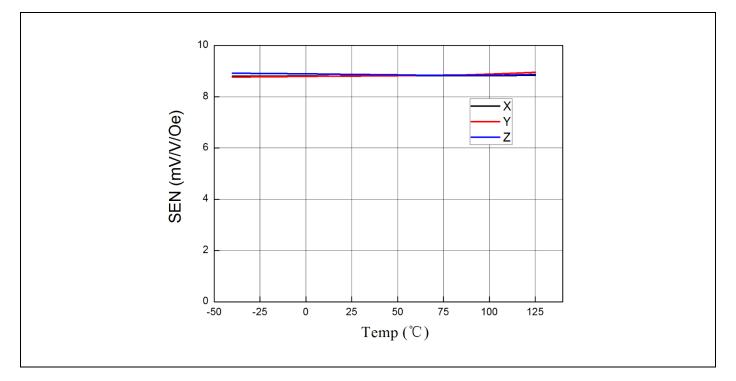

## **Transfer Curve**

The following figure shows the response of the 3-axis TMR2307 to an applied magnetic field in the range of ±3 Oe When the 3-axis TMR2307 is biased at 1V.

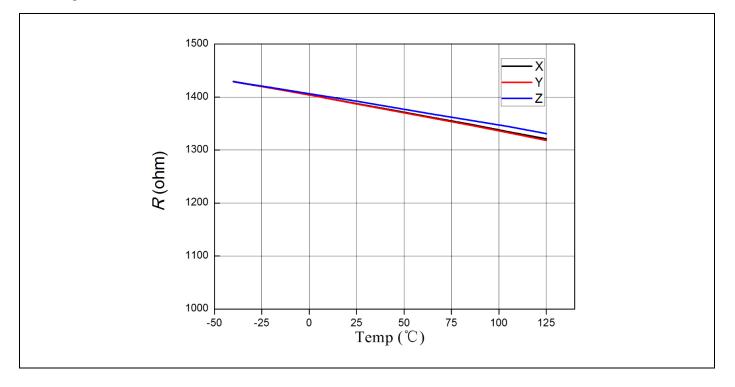

## Sensitivity Vs Temperature

The following figure shows the changes in sensitivity of the TMR2307 as a function of temperature in the range of -40 to  $125^{\circ}$ C.

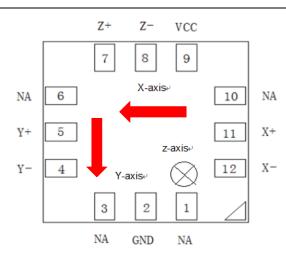

#### **Resistance Vs Temperature**

The following figure shows the changes in resistance value of the TMR2307 as a function of temperature in the range of -40 to 125 °C.

# **Pin Configuration**

(Arrow indicates direction of applied field that generates a positive output voltage.)

#### Bottom view<sub>€</sub>
